Oleoylethanolamide 200 mg +
Pantethine 75 mg + L-Valin 10 mg Softgel Capsules

The Proven Combination To Combat Liver Diseases

OLEOYLETHANOLAMIDE

- OEA works to activate something called PPAR α (Peroxisome Proliferator-Activated Receptor Alpha) & simultaneously ramps up fat-burning and decreases fat storage.
- Responsible for the feeling of satiety following meals
- Oral supplementation of OEA can be recommended for weight loss

PANTETHINE

- Used for lowering levels of cholesterol and triglycerides in people with diabetes or high levels of lipoproteins in the blood (hyperlipoproteinemia)
- May transfer fat from the liver and viscera to the subcutaneous tissue.
- Increase the concentrations of chemicals that lower blood cholesterol & triglycerides.

L-VALIN

- A branched-chain essential amino acid (BCAA) which has stimulant activity thus promotes muscle growth and tissue repair
- Promotes mental vigor, muscle coordination, and calm emotions
- Also lowers elevated blood sugar levels and increases growth hormone production
